This is my friend's truck, a 2003 Ford Ranger 4-cyl manual trans. She was driving down the highway in 5th gear, all of a sudden hears a pop. Engine keeps running, truck acts like it is in neutral (step on the gas and it doesn't move). She can move the shifter into any gear, it always acts like it is in neutral. She can hold the clutch, start ...

[1995 Ford Ranger: the Manual Transmission Wont Go Into...](#)

Check your transmission fluid. Transmission fluid lubricates the moving parts of your transmission. You should check your fluid every 30,000 to 60,000 miles in a manual transmission car. Failure to do so can cause your transmission fluid to become contaminated with bits of metal from the bearings, synchronizers and gears.

[96 Ranger. I replaced the clutch. Now it won't go into gear](#)

1994 ford ranger, My stick wont go into fifth gear position. When you put the Shift Handle back into the TOP of the transmission, there is a spring on the Top and it that comes loose, it would cause this.

The Signs of Automatic Transmission Won't Shift into 3rd Gear. The problem could occur in a couple of forms such as: The transmission shifts into the first and then to second gear but does not move into the third gear. It seems that the gear slips into neutral when you push it to the third. Another instance could be the automatic transmission won't shift into 3rd gear at all. It smoothly ...

[Diagnosing Symptoms of a Bad Manual Transmission ...](#)

Follow the pressure test diagnostic in your manual to identify possible problems. If pressure is lower than recommended, it can be an indication of a bad solenoid or other potential problems that would prevent your transmission from shifting into gear, including bad internal transmission clutches or a bad fluid pump. (Related Article: How to Perform Transmission Line Pressure Test - Ford ...

I wasn't driving my 2008 manual Ford Focus a week ago, and when going into 3rd gear my gears grinded and when I finally got into gear I felt a new looseness between 1st and 3rd gear, and going into 1st became difficult. When I pushed forward to go into first, the stick would pop back, or it stayed up but it wouldn't catch and actually go into gear. Driving home today, I got into 1st gear and ...

[2006 Ford Focus Won't Go Into Gear: 5 Complaints](#)

Popping out of gear is a common problem when it comes to manual transmissions. The most common reason a manual transmission would jump out of gear is due to low or contaminated fluid, worn synchronizers inside the transmission, or improperly adjusted shift linkage. Also I suggest that the transmission mount is checked for excessive wear because bad mounts have been verified as a fix to similar ...
