The solution to the ice age mystery originated when the National Science Foundation organized the CLIMAP project to study changes in the earth's climate over the past 700,000 years. One of the goals was to produce a map of the earth during the last ice age. Scientists examined cores of sediment from the Indian Ocean bed and deciphered a continuous history for the past 500,000 years. Their work ultimately confirmed the theory that the earth's irregular orbital motions account ...

Ice Ages: Solving the Mystery. Enslow Publishers, 224 pp. INTRODUCTION: Between about 75,000 and 18,000 years ago, glacial ice spread from centres near Hudson Bay and eventually buried all of eastern Canada, New England and much of the North American midwest under a sheet of ice, known as the Laurentide Ice Sheet, that averaged two kilometres in thickness. At the same time, a second ice sheet ...

An ice age is a period when for a long time the temperature of Earth's climate is very low. This leads to an expansion of the continental ice sheets, polar ice sheets and mountain glaciers.. Ice age is a term used in palaeoclimatology for the period of extensive ice sheets in the recent Pleistocene period. We now know that ice ages have happened a number of times in the past, the greatest and ...
