If the regular price of a sweater is \$15.00, what is the discount? _____ Subtract the discount you found from the regular price to find the sale price. _____ 2.

[Sales Tax and Discount Worksheet - Heritage Grove Middle ...](#)

So this seems like a lot of work for one problem. There is a shorter way! You can also change the percents to decimals and use multiplication. Let's try one that way. Example 4: Original price of a hat is \$28.50 There is a discount of 40%. Tax is 5%. When you change a percent to a decimal you divide by 100 or just simply move the decimal to the left 2 places. $40\% = .40$ $5\% = .05$ It actually ...
