The same remarks hold true for Crystal's "Cambridge Encyclopedia of Language." That work is presented in the same way, but with much a broader scope - it covers all aspects of human language. I like to browse in it and then get greater detail from the English Language book - they work very well together. I'm in awe of Crystal's ability to present such huge subjects so coherently and in such a ...

A superb reference book covering all aspects of the development of the English language, its vocabulary, usage, orthography, spelling, variants, punctuation etc. David Crystal wears his expertise lightly, which makes the book a delight to use and very accessible, with lots of illustrations, diagrams, photos and examples. There are also appendices and lists for further reading.

David Crystal is highly regarded in the English language World, and this book reflects that. As a first year A level student studying the subject i found this book great in detail and context. It can be used for study in a wide range of courses and degrees. The book isn't made to be read cover to cover and has easy to find sections on many aspects of the English Language from Basic grammar to Sociolinguistics. i would highly recommend this book for all types of people studying or taking an ...

The Cambridge Encyclopedia of Language is a broad survey of language and linguistics, aimed at a popular audience. It is organised thematically, with sixty five chapters divided into eleven parts. Part one highlights popular ideas (and especially misconceptions) about language, covering such topics as description versus prescription and the equality of languages. Part two considers the ways in ...
