lab04 - matplotlib and visualizations

Matplotlib supports event handling with a GUI neutral event model, so you can connect to Matplotlib events without knowledge of what user interface Matplotlib will ultimately be plugged in to. This has two advantages: the code you write will be more portable, and Matplotlib events are aware of things like data coordinate space and which axes the event occurs in so you don't have to mess with ...

matplotlib - PyPI

To test that you have successfully installed matplotlib and numpy, run the code provided in pkgtest.py, which should generate a graph for you. If you have problems with installation, be sure to go to office hours or post on Piazza for help, or try working on Athena. If you choose to work on Athena, you don't need to install anything.

Matplotlib - Wikipedia

For most beginners, the first package that they use to get in touch with data visualization and storytelling is, naturally, Matplotlib; it is a Python 2D plotting library that enables users to make publication-quality figures. But, what might be even more convincing is the fact that other packages, such as Pandas, intend to build more plotting integration with Matplotlib as time goes on.

Line colour of 3D parametric curve in python's matplotlib ...

I came across this example in the Matplotlib website. I was wondering if it was possible to increase the figure size. I tried with f.figsize(15,15) but it does nothing.

?????? - Matplotlib ????

It's an optional field. Once inserted the 'specific UV password' (from the Settings Section of the Virtual Office Application), the Professor can fill in the field with this password for quicker login.
