[The Science of Phototherapy - 1st Edition - Leonard I ...](#)

The emphasis is on the science underlying the various phototherapy procedures, which encompasses aspects of classical and molecular photophysics, biological photochemistry, photobiology and biophotonics. Topics that do not usually appear in other general sources include the theory and applications of tissue optics, Monte Carlo simulation, light dosimetry, and analytical modeling of laser surgery. Many illustrative problems with answers are provided to exemplify the more quantitative aspects ...

[Light therapy - Wikipedia](#)

Phototherapy comprises the use of ultraviolet A and B light to treat skin disease. It has long been known that the action of the sun's rays on the skin can suppress inflammation and itch. The science behind this was discovered over the last few decades. Ultraviolet produces anti-inflammatory molecules in the skin which are good at suppressing ...
